

# Pharmaceutical

Innovative approaches have been developed to successfully resolve the challenges presented by our pharmaceutical clients

In recent years, Fluidics' unique ability to meet the special needs of the pharmaceutical industry has led us to form a team of professionals dedicated to serving this competitive and highly regulated industry. Fluidics' Pharmaceutical Division, operating with its own project management and field technical staff, has developed specialized systems to satisfy the critical requirements of our pharmaceutical clients.

## A Team of Experts Supporting your Business

Hand picked project management people, field foremen, and tradesmen round out the Pharmaceutical Division's specialty team. All have been indoctrinated in safety practices that meet the stringent requirements of our clients.

Our major clients, including Merck & Co., GlaxoSmithKline, Sanofi, Bristol Myers Squibb, and Johnson & Johnson have placed Fluidics on their preferred list of contractors. The reason is simple: They appreciate our professionalism and our ability to complete their projects on time and within budget.

Fluidics' vision in creating this specialty team has made our Pharmaceutical Division one of the best known resources for meeting the demands of this one-of-a-kind industry.
